Summary

Over 7 years of experience building scalable React applications, distributed frontend architectures and high-availability SaaS platforms for healthcare and education products. Specialized in React, TypeScript, micro-frontends and frontend architecture, with a strong focus on performance, maintainability and developer experience.

Skills

Core

React, TypeScript, JavaScript, Next.js, Tailwind CSS

Architecture

Micro-frontends, Module Federation, Design Systems, SSR/SSG

Backend

Node.js, NestJS, PostgreSQL, Supabase

Cloud/Infra

AWS, GCP, CI/CD

Experience

Arcotech

Remote

Software Engineer III

Sep 2024 - Nov 2025

Designed and maintained a distributed micro-frontend architecture using React, TypeScript and Module Federation, supporting platforms used by millions of students and thousands of schools across Brazil.

Developed shared libraries and internal tools adopted by multiple squads, reducing duplicated efforts and increasing consistency across applications.

Contributed to platform scalability and stability, accelerating delivery cycles and increasing frontend team autonomy.

Alliança

Remote

Senior Frontend Engineer

Jan 2022 - Aug 2024

Led the frontend architecture and development of a SaaS platform for the healthcare sector with distributed operations across Brazil.

Developed secure and high-performance interfaces for large-scale operational workflows, increasing reliability and operational efficiency.

Contributed to frontend architecture modernization and engineering standardization, improving maintainability and development speed across teams.
